👤 About me

As a 22 year-old aspiring web developer, I'm someone deeply committed to fostering inclusivity, diversity, and equity. My journey, marked by music education and entrepreneurial ventures, has sculpted a unique viewpoint rooted in diverse experiences. I find my stride in environments that celebrate different perspectives, understanding the transformative power of collaboration in shaping a better world. Working for me isn't just about a job—it's about aligning with my core values, an opportunity to infuse my skills and unwavering dedication into crafting workplaces that embrace everyone.

👨‍💻 Experiences

My coding journey began with launching my own ecommerce platform called *"Phone Printers."* This venture allowed me to delve into the world of coding.

Navigating the intricacies of web development, I discovered a profound affinity for software development. Selling *"Phone Printers"* marked a pivotal moment, enabling me to fully dedicate myself to this newfound passion.

Transitioning into a comprehensive boot camp program. I bring with me humility, patience alongside a fervent enthusiasm for coding. While my journey may not have followed a traditional path, the unique blend of experiences has equipped me with valuable skills and perspectives that I am eager to leverage in my pursuit of a career in software development.

📚 Education

At *[Pepper Code Academy](#)*, I've immersed myself in a comprehensive curriculum encompassing essential web development concepts. From mastering JavaScript, TypeScript, Node, CSS and HTML to navigating databases like MongoDB and MySQL, I've acquired the skills necessary to excel in software development. Moreover, hands-on experience with modern

frameworks like Express and React as well as proficiency in testing with Jest. Furthermore, I've actively participated in pair programming sessions with fellow students on a weekly basis, honing my collaborative skills and deepening my understanding of code architecture and problem-solving strategies.

🎎 Projects

Weather App

- **Overview:** Developed a dynamic weather application that provides real-time weather data using *React* for the frontend and *Node.js* with *TypeScript* for the backend. Integrated with the OpenWeather API to fetch weather information and deliver it to users.
- **Technologies Used:** Node.js, TypeScript, Express.js, Axios, React, Tailwind CSS …

Github Repository: Weather App repository

Star Wars App

- **Overview:** With this Star Wars application users can interact with characters while enjoying background music. The frontend allows seamless exploration of character data, while the backend efficiently retrieves information from a dedicated Star Wars database, ensuring a smooth user experience.
- **Technologies Used:** React, Node.js, Axios, Styled Components, React Hook Form, TypeScript, and Express, Tailwind CSS …

Github Repository: Star Wars App repository

OpenReactBot

- **Overview:** Developed OpenReactBot, a versatile NPM chatbot component for React applications, seamlessly integrating AI-powered conversational interfaces. Leveraging OpenAI's language models, OpenReactBot enhances user engagement and functionality within applications.
- **Technologies Used:** React, TypeScript, OpenAI, and bundling achieved through Rollup.
